

Wastewater System Improvements

What Typical Construction and Restoration Looks Like

SURVEYING AND STAKING

The project area will have various markings along the pipe alignment. Trees may be labeled differently. Please talk to the project manager or inspector to confirm what markings may mean for the project.

MOBILIZATION AND SITE PREPARATION

CONSTRUCTION ZONE

Security and privacy fencing may be installed.

Construction zones will be large enough for excavators and dump trucks to move.

PIPE CONSTRUCTION

24-inch wastewater pipe project under a street.

Manholes vary in size depending on the amount of wastewater a community creates.

DURING CONSTRUCTION/AFTER RESTORATION

Charlotte Country Club Golf Course during construction and immediately following restoration.
